About this program

Notice that more features are available in the area of an open PDF file and by right-clicking the document. More on that later in this document.

THE DOCUMENT AREA

Opening a document will place it in a Tab below the toolbar in the main window.

NAVIGATION

You navigate between documents just by clicking the appropriate Tab.

CLOSING FILES

Any file can be quickly closed by clicking the **x** mark on the Tab to the right of the file name.

DOCUMENT OPTIONS

Right-click and you will see a popup windows with additional options.

THUMBNAILS

This view provides a thumbnail view of all pages in the open PDF document. With this feature you can also pick a number of pages, right-click and select to print them.

BOOKMARKS

This view gives a good overview of any bookmarks that exists in the PDF document.

ATTACHMENTS

One of the features of a PDF document is its ability to carry attached files. In this view, you will have an overview of those if any.

ADDITIONAL FEATURES

OPEN OR PRINT MULTIPLE FILES

With the PDF Studio as the default viewer you can select a number of files in the File Explorer, then right-click and select the Open menu. This will open all files in separate Tabs in PDF Studio.
